a family. During her interaction with Eron Black, Eron would ask her about her return, to which she responded that a million souls had yelled for my return, which fans had referred to #WeWantMilena on Twitter asking for the Twitter pages of High Ed Boone, Lethal Kombat and Netherrealm Studios to bring Milena back to the roster. After Kombat Pack 2 was announced, Kari Walgren (voiced by Millena) gave an audio response to Millena fans. [3] MK 2011's Error, in her flesh pit costume, removes her mask despite her still not being present at all. At MK 2011, Millena will use leap lunch-enhanced special moves when Sai is lodged in her opponent's back, and if she jumps after gnawing and stabbing, she will reveal her face without turning the veil back on. This change is not shown in her X-ray move or her fatality. It can be fixed if she uses and lands another leap movite. This could possibly be a flaw. Defeating Xiao Khan with Millena's leaping neqbitro on the arcade ladder will still bleed his neck as Millena defeats him in the victory film. This could also likely be a flaw. In 2011, when Mk Challenge Tower's #184 defeated By Baraka and defeated Millena (Baraka's partner) and the reptile, baraka strikes a victory pose. Her new renovated tarcartan teeth tend to clip through her lips during certain fatalities at MKX. In the MK11, Millena's clasique outfit doesn't have a holter of the Cis, causing it to float in the air at the back.
